

### 3 - Way

It helps to nominate one player to keep all the scores below. A clipboard or similar helps too.

The game is 3 players with 3 boules each. Toss or throw together one from each player for the starting order  
Thereafter within an end the player furthest from the coche always plays first  
The winner of the previous end starts the new end followed by the 2nd nearest then third nearest player

#### Scoring

Score the same way as usual, the player nearest the coche scores as many points as he is holding.  
The others do not score.

There is another way that makes it easier for less skilled players to score and you can use this if you prefer  
The player whose boule is nearest the coche scores 3 points, that's all. He then removes his other 2 boules  
The next nearest player's boule then scores 2 points, that's all. The least nearest still scores 1 point

Timed games rules apply. At the bell finish the end and play one more. If a draw, the 2 play off in an extra end

First to 26 wins, 26 because this makes it easy to halve to be the equivalent of a normal doubles score for prizes
